Projects

Samsung

Samsung E-commerce portal that sells handled devices and other electronic products online. Multistore application which has respective stores for different customer groups like B2C, B2E, B2B. Portal built on Magento 1.9.4 and has all the standard shopping cart features. In addition, portal has custom inventory management tool, custom tabs, custom payment gateways, custom layout, performance tools, logging tools, and two step checkout system.

Technology Used: HTML5, CSS, Mysql, Magento1.9

Dropship

The application is an E-commerce portal which is used as a merchant to distribute its product to different vendors. Created an extension which imports the product, product price based on vendor profile from merchant store to vendor store through rest API's. Vendor can replicate his order to the merchant store. When merchant ships the order it automatically syncs the order status in vendor store with tracking ID. Merchant can assign the different product based on customer group for vendors.

Technology Used: Magento 2.2.4, Php, Xml, Ajax, MySQL, ERP

Arteriors

Arteriors is leader in sophisticated lighting, furniture, wall décor and accessories, beloved by discerning interior designer and retailers worldwide. Through close collaborations with skilled artisans from around the world, Arteriors has set of paces with unique designs that transcend trends. From the understated to the unexpected, Arteriors offers an extraordinary assortment with special attention to material, texture, scale and finish. With showrooms in Dallas, London, Los Angeles, New York and High Point, and retail distribution in 73 countries, there are more ways than ever to experience the quality and craftsmanship in our designs. Global expansion has challenged our product design team to develop versatile pieces with universal appeal. Whether a designer is working on a pied-à-terre in Paris or a boutique hotel in the Caribbean, we've scoured the globe to create transitional designs that are malleable to any aesthetic.

Technology Used: PHP-Magento 2.x EE, MySQL, HTML5, JavaScript, AJAX

Online web portal

The largest Business-to-business e-commerce platform in Argentina. Integrated the inventory, pricing, catalog and retailer API which will help them to manage the Magento from Sigma ERP. The website has five pricing levels like retailer specific price, group-specific price with respect to distributor which was the complex part of this project which is integrated with the ERP with optimal results. Also used different stock inventory for the different distributors with respect to the product which has been implemented successfully. Integrated the inventory, pricing, shared catalog and retailer API which will help them to manage the Magento from Dash-PRO ERP.

Technology Used: Magento cloud 2.3.3, Php, Xml, Ajax, MySQL, ERP, Rabbit MQ

Shingora

Shingora started out as a manufacturer of shawls, predominantly wool and pashmina. With time and adapting to global tastes, stoles and scarfs were also introduced for women, along with lines for men including pocket squares, shawls, scarfs and stoles and kids (consisting of Disney licensing) in India.

Technology Used: Magento2
