## Projects

---

### KudosCast

KudosCast is used for Social Media analytics, where users can create campaign and share campaign on social media. User will send a discount code to the admin registered number which is shared with him manually at the time of walk-in. Admin will send website URL with campaign details to the respective number. Customers will click on the link and interface to share the video from the gallery or a new video can be created. After video is uploaded on server, the video is uploaded to admin YouTube channel and returns a YouTube video link to user and user will be given the option to share the URL on social media sites like (Facebook and Twitter). There are 3 type of campaign on the website Video, Image and Marketing.

**Technology Used:** Laravel 6.2, React JS, PHP, HTML, Bootstrap, Ajax, Java Script

### MomsTribute

Moms Tribute is a website which is used by Moms, where moms can share their life related blogs, writing daily diary, create a To-do list and events. Moms can also create repeating events and can connect with other people by sending automatic messages related the events. There are two types of free user subscription and paid user subscription. For Payment we have implemented Authorized.Net Payment gateway for Recurring Payments (ARB). All the events are synced in Google Calendar, if Moms create any events on the website that will be automatically created on Google Calendar.

**Technology Used:** Laravel 5.5, ReactJS, HTML, Bootstrap, Ajax, Java Script

## BeMiGuest

BeMiGuest is a platform for those who want to rent their property, like Rooms, Living Space, Parking Space, have some service to offer from home and lot more. The application will be both for the Property owners as well as Customers. Customers here will be the ones who will place a request to book a property on rent for some time. There's a backend Admin interface where Admin can Manage both Property Owners and Customers. In case of any Dispute between the Property Owner and Customer, the admin will review the case and sort it out. The payment from Admin to Property Owner will be done automatically. Quick Book Integration to manage the accounting and payments. The system generates Form 1099 dynamically to send to the Property Owners.

**Technology Used:** Laravel 5.7, jQuery, HTML5, JavaScript, BootStrap
