

More than 100 eLearning courses developed on 5 different topics for this educational content provider

Netsmartz created a variety of engaging and responsive eLearning courses for this premier education provider using Authoring tools.

About the Company

Our client is a leader in home care and assisted living services. The client also has an active franchise operation with around 125 franchisees throughout the country. Since 1996, this home care provider has helped families with non-medical home care and assisted living referral services.

The Challenge

The client needed a variety of educational courses on a wide variety of topics that would be responsive and display well on all devices. Timelines were very tight and Netsmartz was one of the few vendors that could fulfill these conditions.

The Approach

The solution was provided using Articulate Storyline, a rapid Authoring tool to create the courses. This offered us speed and efficiency.

The Solution

- Netsmartz has developed more than 100 eLearning courses for 5 different topics.
- Topics of the courses included: Medical Terminology, MOS Certification, and Basic Skills.
- Development was done in Flash and HTML5
- Created multiple programs for different platforms. The challenge was bookmarking and the preloading of audio content in order to sync the audio with interactive flow.
- We have delivered the best quality with most cost effective way using templates and a dynamic approach to meet the tight timelines and the budget.
- Courses were designed with high impact graphics, highly recharged interactivities and, complex animations.

The Result

The client was extremely pleased with the interactive courses we implemented for them and they have been appreciated by end users as well.
