

Summary

- 6+ Years of experience in the IT industry with Architecture, Analysis, Design, Development, Maintenance, Debugging and Testing of web based solutions.
- Experience on full software development life cycle (SDLC) starting from collecting business specifications, user requirements, confirming the design decisions regarding data, process, interfaces, reviewing/audit the code and documenting the entire life cycle.
- Designed and configured MySQL database and backend applications and programs.
- Expertise in UI technologies like HTML, React JS, JS, CSS, and AJAX.
- Designed and implemented payment gateway and cart management app
- Customization of application based on client requirements
- Managed all the development/production server deployment with Nginx, Gunicorn and Supervisor.
- Designed and configured MySQL database and backend applications and programs.
- Led the development of a big hairy scalable Web backend in Python/Django.
- Comfortable working in research, design and development.
- Strong acumen for problem solving and conceptualizing real world issues.
- Quick learner and ability to work persistently on challenging problems beyond scope.
- Strong background in object-oriented programming & concepts, design patterns.
- Proven ability to design, optimize and integrate business processes across disparate systems and mobile technologies
- Demonstrated deployments of enterprise or consumer-facing web software systems using industry standard environments.
- Excellent analysis skills and the ability to develop processes and methodologies
- Ability to rapidly learn and take advantage of new concepts, business models, and technologies
- Designed overall solutions and individual applications

Specialties/Technology

Node JS, PostgreSQL, Python, Django Rest Framework, Mongo DB, Javascript, NodeJS, Socket.io, Git, Google App Engine, Data Collection, CSS, Nginx, REST, SOAP, Php, MySQL, Chrome Extensions, Apache, JSON, Database, HTML5, Web Development, React Bootstrap, Zend Framework, Laravel, AJAX, Angular JS

Highlights

- Handled entire front-end of the website.
- Implemented PSD in HTML/CSS.
- Consuming REST Services
- Saving and retrieving the relevant data from MYSQL

Global Technology Solutions Partner

— SINCE 1999 —

Node JS – Senior Developer

- Used jQuery for animations.
- Designed and implemented e-commerce, deal, events calendar and article apps
- Applications using RESTful API, Database with High-Volume designs for Customer transactions.

Brief Introduction to Experience

Web Solution for choosing Health Plan

Description

This project helps employee or individuals to in terms of choosing their health plan using quantitative criteria like cost, quality, value and rating. It provides a complete overview and actionable analysis of paid and upcoming plan expenses and payments. It provides an excellent tool for comparing and choosing the health plans.

Responsibilities

- Applications using RESTful API, Database with High-Volume designs for Customer transactions.
- Implement mutex, semaphore type of mechanism to distribute user list to each independent process (browser instance) dynamically for its testing
- Implemented forever monitor node module
- Developed a module for report generation
- Implemented several node modules like json2xls, deasync, grunt-protractor-runner and many more.

Web Solution for Financial Advisor

Description

This solution gives employee unprecedented transparency and control over their financial choices and decisions. The organization provides an interactive floor between advisor and their client

Responsibilities

- Develop an application with more stability and good performance in a long run.
- Consuming REST services
- Integrating JQuery Data Tableto Angular environment
- Saving and retrieving the relevant data from MYSQL

Education

- Bachelor in Computer Science and Technology
