SCORM CONSULTANCY

Get your courses SCORM-compliant for better tracking and results

WHAT IS SCORM?

SCORM is an abbreviation for 'Sharable Content Reference Model'. SCORM refers to technical eLearning standards that allow online eLearning content and LMS to communicate with each other. SCORM-compliant courses are compatible with any LMS. With SCORM you can avoid vendor lock-in. If you want to change your platform or tools you can do so without much ado. SCORM-compliant courses also allow tracking and monitoring of users' progress, modules completed, marks scored etc. so you know how well the users are doing.

NEED SCORM-COMPLIANCE?

Do you have custom-developed courses that you need to make SCORM- compliant? Or perhaps you need to run SCORM courses from your server or cloud-based applications? Our eLearning developers are skilled and experienced at implementations with SCORM 1.2, and SCORM 2004 based authoring tools - the standards most prevalent today.

OUR SCORM DEVELOPMENT CONSULTANCY

If you are new to using SCORM allow our team of professionals to guide you through the process. We have successfully built, tested, and deployed over 400 SCORM conforming courses. We will work with you to understand packaging as well as run-time components you will want to consider in your eLearning deployment.

WHAT WE DO

We will explain what works and what doesn't, along with trade-offs and/or advantages of implementation. If you would just like us to implement SCORM tracking we can lend you a hand. Our team can analyze, diagnose, and recommend a SCORM implementation for your existing courses. Allow us to analyze your existing "shelved" courses to see if we can upgrade them. Sometimes we have valuable jewels just sitting around and it takes a fresh perspective to unlock that potential.

SafeWay Driving Systems: a SCORM compliant course

HOW SCORM - COMPLIANT COURSES HELP

SCORM compliant courses are capable of:

- Recording a status of Complete/Incomplete for the e-learning course
- Giving a Pass/Fail along with the grade of the learner
- SCORM packages make a record of time spent and bookmark the course, so when a learner returns to the course it will resume from that page

Why consider SCORM compliance:

- SCORM compliance means you are not tied to a particular vendor
- It ensures every student has accessed every screen of the course -ideal for compliance training
- It is easy to assess competence and knowledge of learners. Assessments, Pass and Fail, Scoring are all possible and you can post student results on your LMS

ABOUT NETSMARTZ

Who we are

Headquartered in Rochester, New York and with multiple offices across the globe, Netsmartz is a CMMi3 & ISO 9001:2008 certified company. Formed over 17 years ago, we currently have over 1000 employees, a rich experience of successfully executing 2000+ projects and working with small companies to Fortune 1000 clients.
